Report on Completion of MLSA Internship

I am excited to share that I have completed my MLSA internship! During this time, I worked hard to finish all the modules and earned a total of 42 badges. This internship has greatly improved my understanding of web development, and I have developed a strong interest in this area.

Intoduction:

Throughout the internship, I learned about different aspects of web development, including HTML, CSS, and JavaScript. The program provided a step-by-step approach, which helped me grasp the basics and apply them right away. Completing all the modules not only improved my skills but also boosted my confidence in creating web projects.

Projects Developed:

Create a simple Portfolio website

This web developer portfolio, crafted with HTML and CSS, highlights the developer's skills and experience through a clean, structured layout. Key sections include an introduction, professional background, and easy-to-navigate links. Visitors can download the resume or explore projects on GitHub. The design combines vibrant colors with modern typography, creating an inviting and professional impression.

1. Develop a Calculator

My calculator project is a straightforward web app developed with HTML, CSS, and JavaScript. The HTML layout defines buttons for digits and operations, CSS

adds a clear, visually appealing interface, and JavaScript manages the calculation logic and dynamic display updates based on user input. The responsive design ensures accessibility on various devices, making this project an ideal introduction to web development by blending essential programming concepts with effective front-end design.

Conclusion:

The MLSA internship has been an amazing experience for me. It helped me learn new skills and discover my passion for web development. I am excited to use what I learned to create more projects in the future. With the knowledge I gained, I look forward to exploring new opportunities in web development and making my mark in this field.
